

Audition Tips and Secrets!

1. Coming to an audition fully prepared with a song completely memorized that showcases your voice in your vocal range is vital.
2. Trying out for a show choir means that you want to showcase a song with lots of energy and add some of your own movement or choreography. Remember, just because you 'like' a song does not mean that it is a good reflection of your voice and can show your best talent.
3. When you sing in front of judges, remember eye contact, and good posture and stage presence too.
4. In any singing audition, projection is going to be one of the highest scores on the score sheet. This means judges or directors are going to be looking for those that look out confidently and sing loud to be heard easily and clearly without a microphone.
5. Learning how to sing in front of people loudly is something that must be practiced at home.
6. People that audition with a high energy song, that they can sing loudly, and do their own movements or dance to are going to get the highest marks.

Good Luck!
